

We are excited to announce the training locations for the Tribal Data Exchange (TDE)!

We hope that you will join us as we host training sessions on the use of the new TDE system. This system is a joint project between the tribes and the BIA, and allows tribes to collect and report GPRA data electronically to the BIA. The system also has a special built-in level of tribal data collection that allows tribes to collect data for their own purposes, or other reporting needs.

These sessions will teach the user how to access the system, report and submit data related to the BIA's GPRA measures as well as create tribal specific measures and reports.

Tribal Data Exchange Training Schedule
